1

Data on births by age of mother and birth order in 1949-1985, originally for total births (live plus still births) were recalculated into live births using the iterative proportional fitting procedure (see Appendix 2 in the Background and documentation file).

2

Data used for recalculating births by age of mother and birth order in 1949-1985, originally for all births (live plus still births) into live births.

3

It is recommended treating women with the unknown number of children from the Censuses 1980, 1991 and 2001 as childless women (see the Background and documentation file).
