Live births by month

2012-2014: Statistics Canada. Received from Health Statistics Division, Statistics Canada. (RefCodes 19, 20)

2010-2011: Statistics Canada. Received from Health Statistics Division, Statistics Canada on November 23, 2015. (RefCode 18)

FEMALE POPULATION: Distribution by age and parity

1991: Statistics Canada. Custom tabulations of females 15 years and over by single years of age, marital status and by number of children ever born alive for Canada and provinces from the 1991 population census, file BO-0380. (CD-ROM received on 01.04.2010). (RefCode 5)

FEMALE POPULATION: Exposure by age and year of birth

1991-2016: Female exposure population by calendar year, age, and year of birth (Lexis triangles) is estimated using data on population size and deaths from the Human Mortality Database, which is available at http://www.mortality.org or http://www.humanmortality.de.

For the period before 1991, the territorial coverage of the HMD and the HFD data differ, and HFD female exposure population was therefore calculated using population and death counts by provinces and territories of Canada provided by the Canadian Human Mortality Database (http://www.bdlc.umontreal.ca/chmd/index.htm). For further details, see the Background and Documentation file.
