

1

Data on age-specific births for 1922–1974 and monthly births for 1900–1974, originally excluding live births that died during childbirth or during the first 24 hours of life, were re-estimated using the methodology described in Appendix 2 of the country documentation file.

2

The sum of births by month for 1989 is 408,023, while both the given total and the sum of births by age of mother is 408,024. The source of this difference (1 birth) is unknown.

3

Data on births for 1978, 1979, 1986, 2005, and 2007 were adjusted for misreporting of births of first and second birth order in certain regions, as described in Appendix 3 of the country documentation file.
