

The figure consists of two vertically stacked plots sharing a common x-axis representing 'Year' from 1960 to 2020.

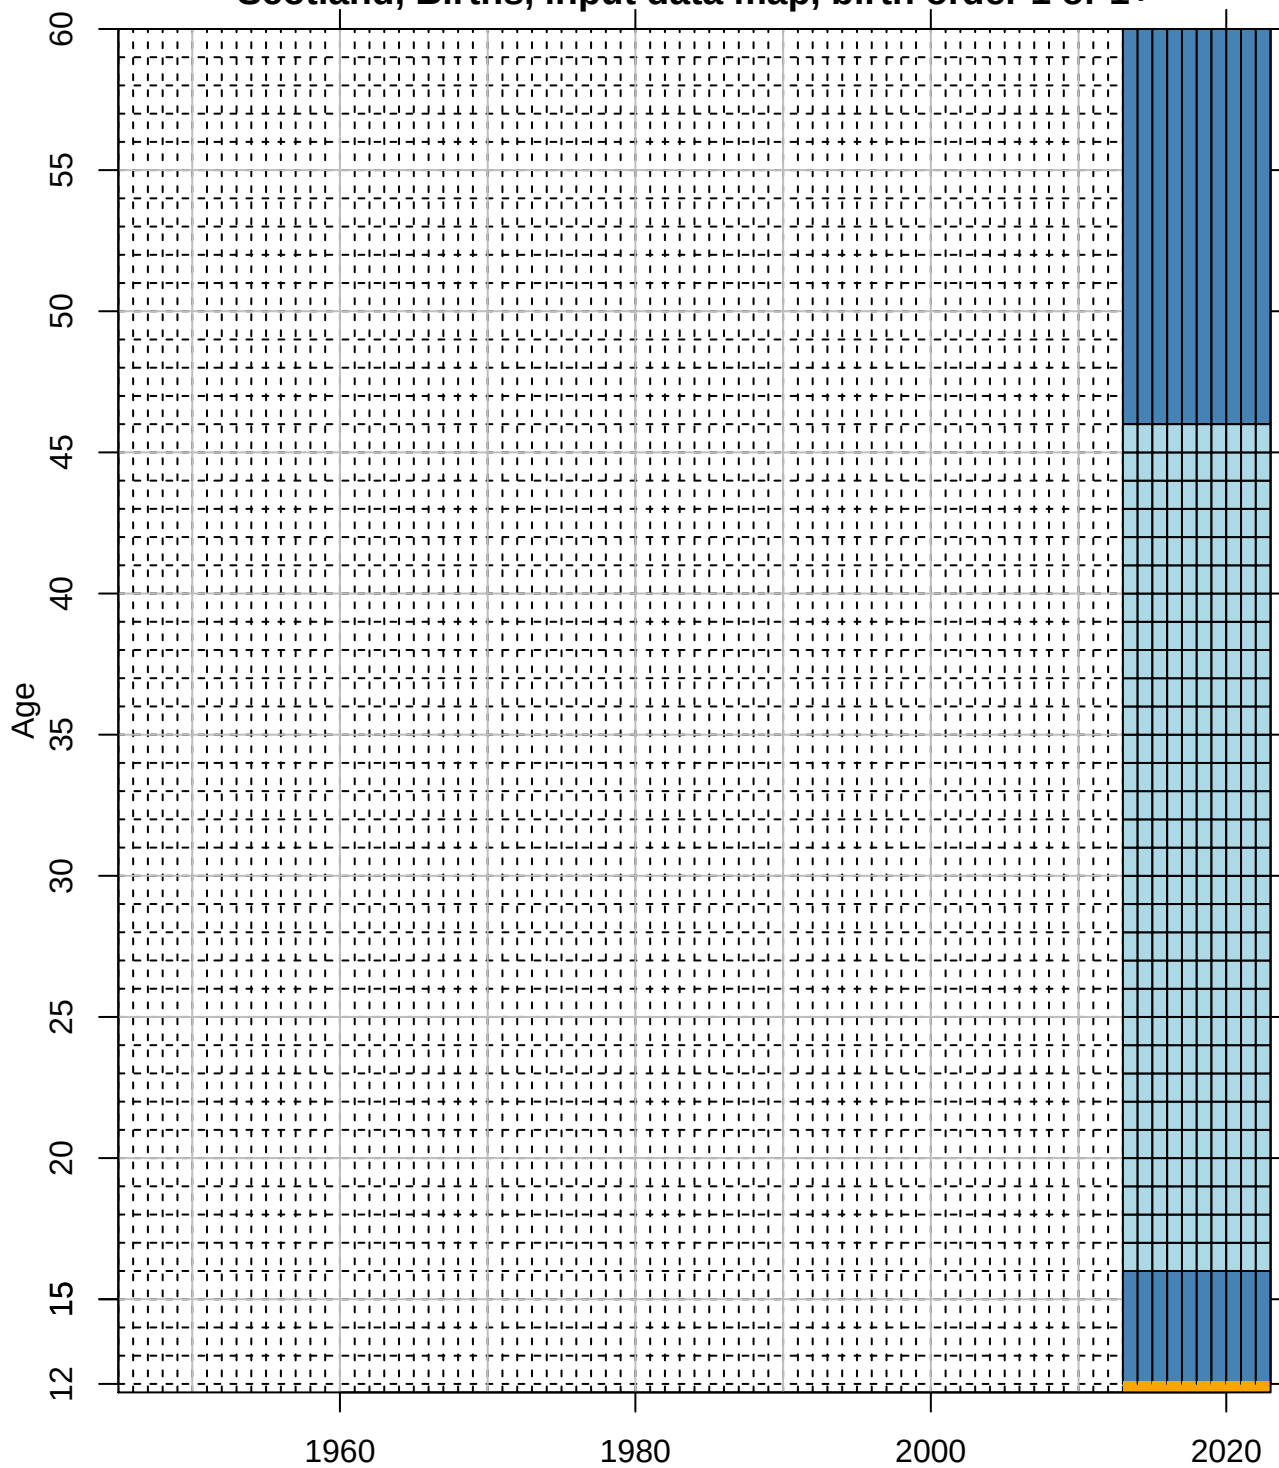

The top plot is a heatmap with 'Age' on the y-axis, ranging from 12 to 60. The background is a light blue grid. Overlaid on this are several vertical blue bars of varying widths and heights, primarily concentrated between ages 12 and 25 and between 45 and 60. These bars represent specific data points or intervals across the years.

The bottom plot shows 'Birth order' on the y-axis, ranging from 1 to 8. A solid green horizontal line is drawn at birth order 6. A light blue shaded region is present, primarily between birth orders 1 and 5, and between years 1960 and 2020. The shading is more intense in the later years, particularly after 2000.
