1

Births born abroad are not included.

2

Births born abroad are included.

3

For 1979, some discrepancies were found between the sums of order-specific birth counts for ages 20-24 and 45-49 calculated by the HFD team and the corresponding totals provided by the National Statistical Service of Greece. Seemingly, in the official data three births from the age group 20-24 were wrongly placed in the age group 45-49. We moved these three births to the age group 20-24 so that the totals and the calculated sums by birth order would match for these two age groups.
