1
Monthly data on births up to 2018 pertain to the present population, while data on births by age of mother pertain to the resident population; therefore, the respective totals do not match. Also, monthly births are by month and year of occurrence, while births by age of mother are by year of registration.

2
The data on birth counts were originally provided by year of their registration. For further computations we assume that the births were registered in the same years as they occurred. More information can be found in the Background and Documentation file for Italy.
