

1

For the years 1969–1982 and 1984–1986 the data obtained from the ODE were compared with the original data from the CBS, and the missing numbers of births for the ages 12–14 were added.

2

For the age category -14 in the year 1951, the number of first live births as reported by the ODE was corrected from 7 to 9, to conform to other sources (the CBS and Eurostat).

3

The sum of births by month in 1865, 1875 and in 1893 through 1935 is not equal to the provided total of births in these years. The source of this discrepancy is unknown.

4

The sum of births by month in 1951 is 228,405, while the sum of births by age of mother is 228,407. The source of this discrepancy is unknown.

5

Data on live births by Lexis triangles for 2010–2018 were reconstructed from data by Lexis squares and data by Lexis vertical parallelograms as described in section 4.2 of the Background and documentation file.
