Germany, Data Sources

LIVE BIRTHS

Live births by age/cohort of mother

1990-2008: Statistisches Bundesamt Deutschland. Lebendgeborene nach dem Geburtsjahr der Mutter, Deutschland [Live births by mother's year of birth, Germany]. Live births by vertical parallelograms. *(RefCodes 1, 11)*

1956-1989: Statistisches Bundesamt Deutschland. Lebendgeborene nach dem Geburtsjahr der Mutter, ehemalige DDR und Früheres Bundesgebiet. [Live births by mother's year of birth, East Germany and West Germany]. Live births by vertical parallelograms. *(RefCode 4)*

Live births by age/cohort of mother and birth order

2009-2017: Statistisches Bundesamt Deutschland. Lebendgeborene nach dem Geburtsjahr der Mutter und der Lebendgeborenenfolge, Deutschland [Live births by mother's year of birth and birth order, Germany]. Live births by vertical parallelograms. *(RefCode 5, 19)*

Live births by month

1946-2017: Statistisches Bundesamt Deutschland. Lebendgeborene, Monatliche Werte, Deutschland (vor 1990: Früheres Bundesgebiet und DDR) [Live births by month, Germany (before 1990: sum of data for West and East Germany)]. *(RefCode 3, 18)*

FEMALE POPULATION: Exposure by age and year of birth

The female exposure population by calendar year, age, and year of birth is estimated using the methods protocol of the Human Mortality Database (HMD), available at http://www.mortality.org, based on data on population size, deaths, and live births by year and sex provided by Statistical Office of Germany (Statistisches Bundesamt). For the period 1988-2011 an inter-censal adjustment of the published population estimates has been applied (see Scholz et al., 2018 and Klüsener et al., 2018 for details). *(RefCode 20)*
